Summary

- Software Engineer with a Computer Science background, focused on building reliable and maintainable web applications.

Education

Cairo University, BSc. in Computer Science and Artificial Intelligence Sept 2020 – July 2024

Experience

Web Developer Freelancer June 2025 – Present

Al-Haweess — LMS for secondary-school students. [link to website](#)

- Built teacher/admin dashboards for lessons, exams, assignments, and payments.
- Integrated Vimeo (video), Kashier (payments), and Cloudinary (media).
- Added a points system and leaderboard for student engagement.
- *Tech: NestJS, Next.js, MongoDB, TypeScript, JWT, Vimeo, Kashier, Cloudinary*

Leadora Solutions — CMS-driven business services platform. [link to website](#)

- Built a flexible CMS letting admins control all website content without developer intervention.
- Integrated Calendly for bookings, Stripe for payments, and a real-time client-admin chat.
- *Tech: NestJS, Next.js, MongoDB, TypeScript, Stripe, Calendly, JWT*

Dial Masters Solutions — CMS-backed marketing website. [link to website](#)

- Built an admin dashboard for independent content and pricing management.
- *Tech: NestJS, Next.js, MongoDB, TypeScript, EmailJS*

EmployMe — Employment marketplace for job seekers and employers. [link to website](#)

- Built job-seeker flows (CV upload, applications, status tracking) and employer dashboard with Paymob subscriptions.
- Designed an admin panel for system control, analytics, and user management.
- *Tech: NestJS, Next.js, PostgreSQL, TypeScript, Cloudflare, Paymob*

XIOT — Online booking system for IoT services. [link to website](#)

- Developed and maintained a booking platform for the client's IoT service offerings.

Software Engineer, [Tecnoblocks](#) Sept 2024 – June 2025

- Built and integrated RESTful APIs and WebSocket endpoints to support real-time features using Socket.IO.
- Gained hands-on experience integrating payment gateways like Stripe and PayPal, enabling secure transactions, subscription billing, and webhook handling.

Backend Intern, [Macber](#) July 2024 – Oct 2024

- Developed and deployed a full-featured HR system, enhancing automation of core processes and improving administrative efficiency.
- Gained valuable insights into organizing code effectively, applying various design patterns, and understanding fundamental principles of software architecture.

Projects

Online XO - Solo Project

[Code](#)

Oct 2023

[link to website](#)

- An interactive online Tic-Tac-Toe (XO) game using Next.js and Socket.IO, featuring real-time multiplayer functionality, with dynamic board size.
- Enabled users to play with board size up to 10.000

Emails Marketplace

April 2025 – May 2025

[link to website](#)

- Implemented user resale and auction features for digital assets.
- Implemented Ethereum-based payment for email purchases and real-time notifications.

Certificates Platform

April 2025 – May 2025

[link to website](#)

- Built a platform to store certificates safely in blockchain.
- Integrated Stripe for user subscriptions and payment processing.

Chatbot Generator - Solo Project

[Code](#)

May 2025 – June 2025

[link to website](#)

- A chatbot builder platform that allows users to visually design conversation flows and embed them into their websites or apps (npm package) like Telegram bots.
- Experienced in testing Next.js and React applications using tools such as Jest and React Testing Library to ensure code quality and reliability.

Extracurricular Activities

- **ECPC (Egyptian Collegiate Programming Contest)** — Participated twice in the national competitive programming contest, representing Cairo University and solving algorithmic problems under timed conditions.
- **LeetCode** — Solved 500+ problems across data structures, algorithms, and system design topics, consistently practicing to strengthen problem-solving and CS fundamentals.

Skills

- **Programming Languages:** C++, Python, JavaScript, TypeScript, C#.
- **Web Technologies:** HTML, CSS, Node.js, Express.js, NestJS, Next.js, React, Angular.
- **Backend:** RESTful APIs, WebSocket (Socket.IO), Microservices, Message Queues (RabbitMQ).
- **Databases:** MongoDB, PostgreSQL, Redis, SQL Server.
- **Cloud & DevOps:** Docker, Linux servers, VPS deployment, Git (GitHub), CI/CD familiarity.
- **Foundational Knowledge:** SOLID, OOP, Software Architecture (layered & modular design), API security, Payment Gateway Integration, Testing (Jest, React Testing Library).
- **Soft Skills:** Collaboration, Communication, Leadership, Adaptability, Problem-solving, Time management, Critical thinking, Conflict resolution, Creativity. Comfortable working in Agile environments (task breakdown, sprints, code reviews).
